Correct	
 Every hyperparameter, if set poorly, can have a huge negative impact on training, and so al equally important to tune well. True or False? 	ll hyperparameters are about
True	
False	
Correct Yes. We've seen in lecture that some hyperparameters, such as the learning rate, are mo	ore critical than others.

	There is one global value of $\gamma\in\Re$ and one global value of $\beta\in\Re$ for each layer, and applies to a units in that layer.	ll the hidden
	Un-selected is correct	
	The optimal values are $\gamma=\sqrt{\sigma^2+\varepsilon}$, and $\beta=\mu$. Un-selected is correct
